

JOB PORTAL

Carriere

Finding jobs that best suit the interests and skill set is quite a challenging task for the job seekers. The difficulties arise from not having proper knowledge on the organization's objective, their work culture and current job openings. In addition, finding the right candidate with desired qualifications to fill their current job openings is an important task for the recruiters of any organization. Online Job Portals have certainly made job seeking convenient on both sides. Job Portal is an online platform component where recruiter as well as the job seeker meet aiming at fulfilling their individual requirement. They are the cheapest as well as the fastest source of communication reaching a wide range of audience in just a single click irrespective of their geographical distance.

The web application "Job Portal(Carriere)" provides an easy and convenient search application for the job seekers to find their desired jobs and for the recruiters to find the right candidate. Job seekers from any background can search for the current job openings. Job seekers can register with the application and update their details. They can search for available jobs and apply to their desired positions.

They have an option to subscribe to email notifications which will alert them when there is a new job opening added onto the portal. It also sends the job seeker a confirmation email on registering for a particular job. The Admin will be able to download the list of candidates who have registered for a particular job opening(optionally send it to the respective companies) using which they carry out their respective candidate filtering processes. Only the Admin will have rights to post new job openings while both will be able view all the listed jobs.

On top of everything, the Users will be able to edit their profile after logging in through the profile tab and also have the flexibility to unregister before the deadline specified by the company, in case they change their mind later on. This type of a Job Portal will be extremely helpful for places such as colleges, where it eases the data collection process of prospective candidates for the career centers who then consolidate it and send it to the respective companies and also serves as a complete "career" module for firms.
